

## PRIME SEAL 5800 “QUICK-MIX” CARTRIDGE NOW IN CONVENIENT LARGER SIZE, DOUBLING VOLUME

- *Double Volume, 300ml x 600ml Cartridge System Offers Per Ounce Cost-Savings*
- *Increased Convenience, Less Reloading of Cartridges*
- *300ml x 600ml Heavy Duty, 26:1 Mechanical Advantage, Quick-Change Ratio Gun*

Prime Resins, Inc. is pleased to announce the addition of a larger size of our Prime Seal 5800 “Quick-Mix” cartridge system to our product line. The 300ml x 600ml, 2:1 “Quick-Mix” cartridge offers double the volume of the traditional 150ml x 300ml packaging option. Sold six to a case, the new packaging offers a per ounce cost-savings and increased convenience to the customer by requiring less reloading of the cartridge gun while sealing joints.

In conjunction with the new, larger cartridges, Prime Resins offers a 300ml x 600ml quick-change ratio gun. This heavy-duty cartridge gun has a 26:1 mechanical advantage with comfort grip handle, and can be quickly and easily converted from 2:1, 300 ml x 600ml to 1:1, 600ml x 600ml simply by switching a plunger to the alternate plunger that is included with the gun.

Prime Seal 5800 is a two component, pourable, self-leveling hybrid polyurea designed for use as a heavy duty joint filler for interior warehouse / industrial floors subject to heavy forklift traffic and loads. Prime Seal 5800 is commonly used as a joint filler for industrial / warehouse floors, joint filler for cold storage / freezer floors down to -20°F (-28°C), and as a repair material for miscellaneous holes, cracks, and defects in concrete flooring.
